

CRAFCO
AN ERGON® COMPANY

E-Z Pour Melters

- Over 25 years of proven performance
- Most comprehensive service coverage
- Most available options
- Maintains value

The Crafcio E-Z Pour Melter is the real workhorse of the pavement preservation industry and has become the industry standard. Crafcio's twenty-five years of experience in the pavement preservation industry has developed one of the most reliable and efficient melter/applicators available. The E-Z Pour melter features a one-hour heat-up time, which get crews into production fast and easy. The internal design of the E-Z Pour melter handles field mix or packaged material trouble-free and heats up and applies all hot pour sealant. Precision engineering and construction of the E-Z Pour melter make it trouble-free, safe to operate with the lowest operating cost in the industry. There are many safety features such as the splash-proof lid and curb side controls which keep the operator safe. The low profile of the E-Z Pour melter make loading sealant easy. The Crafcio E-Z Pour is a flush-free clean-up system, which requires no solvents and is designed for the operator and production.

For additional information contact Crafcio or one of Crafcio's Distributors. Crafcio has stocking distributors worldwide with regional factory support. Our national and international sales team will be happy to serve you.

Additional Crafcio Products

Crack and Joint Sealant

Crafcio formulates a wide variety of joint and crack sealants that meet and exceed Federal and State specifications. All Crafcio Sealants are guaranteed from start to finish. Crafcio has the broadest line of sealant in the industry making Crafcio your "one-stop shop" for all your sealant requirements. With four manufacturing facilities across the United States Crafcio guarantees efficient and timely shipping, supplying customers with product on-time, every time.

Pavement Joint Adhesive

Crafcio Joint Adhesive is a unique polymerized asphalt product that is applied to the longitudinal cold joint interface between hot mix asphalt paving passes. A thin layer applied to the interface bonds less dense or segregated material together and waterproofs the joint apex, which prevents raveling and crack formation.

Spray Injection Patcher

The Crafcio Spray Injection Patchers are the most cost effective repair systems for pothole repair today. Distressed pavements are cleaned, tack coated, and filled in minutes by one continuous operation. This system can be used year round and is an ideal addition to your pavement preservation system.

PolyPatch

Crafcio PolyPatch is a unique blend of polymer modified asphalt and select aggregate specifically designed for repairing pavement distresses too large for crack sealing and too small for re-paving.

Loop Sealant

Crafcio Loop Sealant is widely accepted for use in sealing traffic intersection loop detectors. Crafcio Loop Sealant provides 100% encapsulation of the sensor wires. Applicator equipment also available.

Marker Adhesive

Both Crafcio Standard and Flexible Marker Adhesive materials assure marker buttons and lane reflectors stay where they are placed. Standard and Flexible Marker Adhesives are hot-applied bituminous based products that are accepted worldwide. Applicator equipment also available.

Roofing & Waterproofing

Crafcio supplies a variety of bulk and packaged asphalt material used in the production of asphalt shingles, in the construction of built up roofing systems and for structural waterproofing. Applicator equipment also available.

TechCrete

Crafcio TechCrete is the flexible solution for concrete repair and is a proven hot pour repair that is different from all conventional rigid repair methods. Once in place TechCrete will move with the pavement and will not de-bond or crack. With Crafcio TechCrete it's a one time fix.

E-Z Pour Melters

E-Z Pour 50, 100, 200 and 400D

Professional Grade Sealant Pump
E-Z PUMP

Better materials and quality craftsmanship make this a stronger and longer lasting pump.

E-Z Pour 200

E-Z Pour 100

Crafco quality

Greater performance, longer lasting and easy maintenance is what the Crafco E-Z Pump is all about. Crafco's improved pump technology has eliminated the chain coupler replacing it with quick change alignment block which makes removal and replacement of the pump fast and easy. New tight tolerance gears provide increased pumping efficiency and less wear. The hardened chrome polished shafts resist breakage. Overall the Crafco E-Z Pump is more durable represented by its precision machined ductile iron housing. Best of all, this performance pump is more economical all around! Crafco E-Z Pump technology makes the E-Z Pour melter the real work horse of the industry.

E-Z Pour Melters the Industry Standard

FEATURES:

- One hour heat-up time
- Flush free, no solvents
- Uses all hot pour sealant
- Ceramic insulation
- Fast melting recovery rate
- Curbside controls
- Low profile
- Splash proof lid
- Low decibel rating
- Bi-directional agitation
- One dial temperature control
- Longer pump life
- Torsional axles **NEW**

OPTIONS:

- Surge brakes
- Various sealant tips
- Warning and strobe lights
- Lockable engine cover
- Custom paints
- Variety of hitches
- Gravity kit for pour pot use
- Tool box
- Fire extinguisher
- Cab brake control
- Auto-Loader
- Compressor

SUPERIOR CONSTRUCTION

All E-Z Pour melters have a galvanized corrosion resistant jacket that is painted with a two part Dupont™ epoxy paint. Under the jacket is a high efficiency ceramic insulation, which surrounds the melter chamber. The frame is a one-piece precision constructed frame designed for balance and easy towing. All melters feature a low profile and adjustable hitch.

ROUND TANK

Configuration provides consistent clearance between the agitator and tank wall for complete agitation. Featuring a .187" wall thickness for lasting durability and a corrosion resistant galvanex jacket.

QUICK AND SIMPLE START UP

All E-Z Pour melters are equipped with a **thermostatic control** featuring a safety shut down. Shut down at the end of the day is just as easy with the "Flush free clean up" system.

POUR POT OPTION Ideal for small batch crack sealing tasks. Available option for all melters. Easy maintenance and sealant application.

OPTIONAL COMPRESSOR

has been available for over ten years and is used with a hot or cold air lance to clean cracks or joints.

Ergonomically engineered loading height features:

- Splash proof lid
- Automatic agitation shut off
- Fume free environment
- No operator back strain
- Light weight loading lid

ADJUSTABLE SPEED BI-DIRECTIONAL AGITATION

INDEPENDENT VARIABLE SPEED PUMP AND AGITATION CURBSIDE HYDRAULIC CONTROLS All controls are on the curbside to increase operator safety giving the operator complete control over material agitation and pumping rate.

OIL JACKETED PUMP Re-circulating heat transfer oil pump on 200 gallon and larger units adds life to the heat transfer oil for fast heat-up. Double pump option, 400 gallon E-Z Pour only.

TORSIONAL AXLES

HIGH EFFICIENCY CERAMIC INSULATION

ENGINE COVER OPTION protects engine from the environment, theft and vandalism.

EASY LOAD OPTION

The use of the optional Auto Loader will enhance the efficiency even more.

OPTIONAL EXTENDED HITCH

LOW CENTER OF GRAVITY Single piece constructed frame for balance and towing ease.

DUPONT™ certified two-part epoxy paint system over galvanized corrosion resistant steel.

The real workhorse in the pavement industry!
